Filed 3/28/91  
Inventor: John Mario Canich  
Title: OLEFIN POLYMERIZATION CATALYSTS

PROPOSED ADDITIONAL CLAIMS

- 8 25. (nov) The process of claim 26 wherein the olefins are selected from ethylene, alpha-olefin having from 3 to 20 carbon atoms, and combinations thereof.
- 9 26. (nov) The process of claim 25 wherein the polymerization conducted is homopolymerization.
- 10 27. (nov) The process of Claim 25 wherein the polymerization conducted is copolymerization.
- 11 28. (nov) The process of Claims 25 wherein alpha-olefin is selected from propylene, butene, styrene, diolefins, and combinations thereof.
- 12 29. (nov) The process of Claim 26 wherein alpha-olefin is styrene.
- 13 30. (nov) The process of claim 26 wherein the process utilized is liquid phase, high pressure fluid phase, or gas phase.
- 14 31. (nov) The process of claim 26 wherein the polymerization process conducted is selected from slurry, solution, suspension, or bulk phase polymerization.
- 15 32. (nov) The process of Claim 26 or 31 wherein the process is employed in series.
- 16 33. (nov) The process of Claim 26 wherein the polymer produced has <sup>13</sup> <sub>D'</sub> below about 4.
